

Dying for Geothermal?

Geothermal, as done on Hawaii Island, is designed for maximum profit and zero accountability

Property Values Go DOWN around geothermal development

If you live within 10 miles of the geothermal plant, are you aware of the community evacuation plan?

If a geothermal disaster happens while your child is in school, do you know what to do? Do you trust the emergency plan to protect the health and welfare of your child?

Do you believe you could safely and quickly evacuate lower Puna in the event of a geothermal disaster?

The chronic and acute illness, the long-term poisoning of air and water, the constant noise to neighbors—all is considered 'collateral damage' by the business owner who seeks to dump the project when it becomes unprofitable or otherwise becomes a liability to the corporation.

There are clean alternatives for baseload power generation – we don't call Hazmat for a massive solar spill, we go enjoy a nice day at the beach.
